 - 有獨立電源供應 (避免使用萬能插頭)
 - 遠離高溫

所有酒櫃不建議嵌入式擺放，另機背需預留最少 100 毫米作散熱空間 (除 Studio 型號外)
注意存放葡萄酒時，避免酒瓶接觸到背板，否則背板的水珠可能會流到酒瓶上而影響酒瓶標籤

The place you have selected for your wine cellar should:

- Be well ventilated – not too damp
- Have an individual electrical socket (multi-socket is not recommended)
- Be well away from any heat source

All cabinets are recommended for free standing only and require a minimum 100mm space between the wall and the back of the cabinet for air ventilation (except Studio model)

To avoid the condensation water running from the back wall onto bottles, please ensure your wine bottles do not touch the back panel inside the wine cellar
